EDUCATION

Gayatri Vidya Parishad College of Engineering for Women

Bachelor of Technology, Computer Science and Engineering

Cumulative GPA: 8.48/10.0

Saint Francis Junior College

Class XII, Aggregate: 93%

Little Angels School

Class X, Aggregate: 88.8%

Visakhapatnam, A.P

2021 - 2025

Visakhapatnam, A.P

2019 - 2021

Visakhapatnam, A.P

2017 - 2019

SKILLS

Programming Languages: C/C++, Java, Python

Web Technologies: HTML5, CSS3, JavaScript, React.js

Others: MySQL, Data Structures and Algorithms, Artificial Intelligence

WORK EXPERIENCE

XceedIQ

Oct 2024 - Jan 2025

Frontend Web developer Intern

- Designed and developed a responsive student registration form that **handled data for over 1,200 students** in the school's admin system.
- Engineered **client-side validation using JavaScript and regex**, which streamlined submissions and **reduced form errors by 30%** within the first month of deployment.

Datai2i

May 2023 - June 2023

Data Science Intern

- Analyzed a telecom churn dataset to uncover key behavioral patterns and variable relationships, **refining 50+ features to boost model performance by 37%**, enhancing customer retention strategies.
- Developed and optimized predictive models using algorithms like decision trees, random forests, and logistic regression, improving classification accuracy across churn scenarios.

PROJECTS

EmotionSense - Emotion-Aware Chatbot | [GitHub](#)

Python | Deep Learning | Flask

- Integrated **real-time speech emotion detection** into a chatbot for empathetic and context-aware responses.
- Trained CNN and LSTM models (best: 1D CNN at 94% accuracy) using audio feature extraction, and data augmentation.
- Deployed using **Flask and ChatGPT API** to enhance human-like interaction in support and wellness domains.

SmartFileSort - Automated File Organizer | [GitHub](#)

Java | OOP | File I/O

- Developed a **desktop-based file organizer** that automatically scans and sorts files into folders based on type, extension or date.
- Utilized **Java's File I/O and OOP principles** to enable modular, efficient directory cleanup with customizable rules.
- Improved system organization and user productivity by reducing manual sorting time by over 70% for bulk files.

BuildMyResume - Interactive Resume Web App | [GitHub](#) | [Live Demo](#)

HTML | CSS | JavaScript

- Built a **responsive web application** that lets users create **professional resumes** with **real-time editing** and live preview.
- Implemented **multiple customizable templates** with dynamic sections, offering a seamless user experience.

ADDITIONAL

Certifications: Algorithms Specialization | Coursera - Stanford Online

HTML5, CSS, JavaScript, React.js | Infosys Springboard

Java Full Stack J2EE | Wipro TalentNext

Position of Responsibility: Senior Member of PICSL club, GVPCEW

Class Representative in 3rd Semester
